DATE MAILED: 01/26/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

SN

Office Action Summary	Application No. 10/700,364	Applicant(s) HARDING, JOSEPH J.	
	Examiner Eugene L Kim	Art Unit 3721	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11, 13, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harding et al (#5,871,429) in view of Hale (#3,819,918) or Reynolds et al (#5,719,678). Harding et al substantially show the claimed subject matter including having a void-fill system that includes a dunnage dispenser, a container scanner 302 that measures the void volume of a container. Harding et al show the use of optical and ultrasonic sensors which transfer information to logic device processor 48 which instructs the machine to produce the required number and lengths of dunnage pads to fill the container (col 18 lines 10-41). Harding et al disclose that the probe may scan the container in one or more areas to determine the amount of pad needed to fill the container (col 18 lines 34+) using logic device 48. Harding et al do not show a height, width and contour sensor as claimed as well as a conveyor for conveying the container in a scan area. Both Hale and Reynolds et al show the use of conveying means that have height, width, length and/or volume sensors to sense the volume of an object. Hale discloses that the operation creates a dependable measuring device which accurately measures, the length, width, and height of the cartons as the cartons move on a conveyor system (col 2 lines 41+) while Reynolds et al disclose that the system is an automated system of determining volumes without requiring openings in a conveyor

Art Unit: 3721

and to obtain other information in addition to the volume. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide Harding et al with the sensing/control means on a conveyor as taught by Hale or Reynolds et al to determine other characteristics other than volume as well as creating a dependable measuring device. The contour sensor is read on the volume sensors for the secondary references. Both references show the sensors being elevated. Reynolds et al show sensing means 120 on an upright as well as sensing means 200 on an upright and sensing means 122 being elevated wherein it must inherently be mounted on some beam structure. Regarding the actual type of sensing means being claimed, the examiner takes official notice that it is well known in the art to use infrared distance sensors, as well as optic laser sensors.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 12 and 14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Harding et al. Harding et al show a dunnage dispenser which dispenses a controlled amount of dunnage material, a void-measuring apparatus 302 and a logic 48 connected to the void measuring device to vary the amount of dunnage material to fill the containers accordingly. The logic device

corresponds to an input device in the form of a lookup table to determine the selection of void-fill density. (co 18 lines 24+).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eugene L Kim whose telephone number is 571 272-4463. The examiner can normally be reached on Tuesday-Friday 8 a.m. to 6 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 571 272-4467. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
